

# Vladimir Djukanovic

## Software Engineer

I am currently finalizing my last year of Master's studies on Mälardalen University, after I have been working a year as Software Engineer in Stockholm. I have a strong academic background and work experience and I was involved in various software projects specifically as Full Stack Engineer and nonetheless as I enjoy coordinating projects and project teams I always strive towards being Project Manager. I would describe myself as a generally curious, ambitious, devoted and charismatic person.
